Village of Holden

NOTICE OF PUBLIC HEARING

PROPOSED MATERIAL CHANGE TO CLAYSTONE WASTE LTD.
MUNICIPALLY-CONTROLLED CORPORATION BUSINESS PLAN

It is the intention of Holden Village Council to consider proposed material changes to the Business Plan of Claystone Waste Ltd., a municipally-controlled corporation.

The purpose of the proposed material changes is to authorize Claystone Waste Ltd. and Claystone Waste Limited Partnership to explore new business opportunities in four areas: accepting non-hazardous waste from outside Alberta at the Beaver Regional Landfill; agricultural services focused on soil amendments and enhancements; energy production and distribution, including electricity generation and renewable natural gas; and water and liquid waste services, including potable water, wastewater, and associated infrastructure.

The proposed amendments would provide Claystone with greater flexibility to evaluate opportunities that diversify revenue sources, leverage its existing facilities and assets and support its long-term business objectives. The amendments would not constitute approval of any specific project. All future projects would remain subject to appropriate due diligence, operational controls, regulatory requirements, and applicable approvals, with continued Board oversight and approval.

Further information, including the proposed amendments to the municipally-controlled corporation Business Plan and supporting documentation, can be viewed on the Holden Village website at www.holden.ca or obtained from the Holden Village office.

Holden Village Council will be holding a public hearing to give residents an opportunity to provide input. Details of the public hearing are as follows:

Date:	Monday, December 21, 2026
Time:	6:45 pm
